PROFESSIONAL SUMMARY

Information Technology student specialising in Creative IT who bridges software development, data, and user experience to turn ideas into usable digital products. Experienced in building cross-platform applications with Flutter and Firebase, enterprise web systems with Java, and data-driven solutions using Python, SQL and Power BI. Developed and evaluated a travel logistics platform through real user testing, achieving an 86.25/100 System Usability Scale score. Seeking an internship where I can contribute to software development and user-centred digital solutions while continuing to grow as a technology professional. **Available from 7 September to 11 December 2026, with flexibility to extend if required.**

EDUCATION

Universiti Teknologi MARA (UiTM) Shah Alam

October 2023 - Present

Bachelor of Information Technology with Honours (Creative IT) | CGPA: 3.62/4.00

- **Relevant Coursework:** Object-Oriented Programming (OOP), Human Computer Interaction (HCI), Database Management Systems (DBMS), Information Systems Engineering (ISE), Information Architecture (IA)

Kolej Matrikulasi Labuan (KML)

August 2021 - May 2023

Science Program (Computer Science) | CGPA: 3.67/4.00

PROJECTS

Final Year Project

PackPals: Crowd-Supported Travel Logistics for Out-of-State Students in Malaysia

- **Technology Stack:** Dart (Flutter), Firebase (Authentication, Firestore, Storage, Functions, Messaging), Google ML Kit, Google Places API, Android Studio.
- Conducted requirements analysis through academic research and benchmarking of five comparable platforms, defining a centralized solution for student local transportation, short-term accommodation and temporary storage.
- Developed a cross platform logistics application with role based mobile workflows and a separate administrator dashboard, implementing rule based service matching, real time bookings and ML assisted identity verification.
- Validated the complete request-to-booking journey with eight target users, achieving an average System Usability Scale score of 86.25/100 and incorporating feedback to improve reliability and ease of use.

Principles of Data Management Project

Soil-Crop Matching for Sustainable Agriculture

- **Technology Stack:** Python (pandas, NumPy, Plotly, Matplotlib, Seaborn, ipywidgets), Jupyter Notebook.
- Integrated two agricultural datasets covering 31 crop categories and 11 soil, climate, nutrient, and fertilizer attributes; standardized schemas and verified both sources contained zero missing or duplicate records.
- Developed an interactive dashboard supporting 11 crop selections and 3 dynamically updated Plotly visualizations, complemented by five exploratory charts analyzing soil types, pH, climate conditions, N-P-K requirements and fertilizer usage to enable data-driven agricultural planning.

Enterprise Programming Project

Healthcare Equipment Management System

- **Technology Stack:** Java, Jakarta EE (Servlets, JSP), JDBC, Apache Derby, GlassFish, HTML, CSS, JavaScript, Apache NetBeans.
- Architected and deployed an MVC-based enterprise web application comprising 12 JSP interfaces, 12 servlet controllers, four JavaBean models and four DAO components, ensuring clear separation between presentation, business and database layers.
- Implemented session-based staff authentication and complete CRUD workflows across three core modules: equipment, maintenance and reservations with status filtering and a dynamic dashboard displaying totals, status distributions and recent activities.

Data Technology and Future Emergence Project

Student Depression Big Data Analytics System

- **Technology Stack:** Apache Hadoop (HDFS), Apache Hive/HiveQL, Microsoft Power BI, Beeline, WinSCP.
- Developed an end-to-end big data pipeline that ingested 27,901 student records across 18 attributes into HDFS, structured the data as an external Hive table and executed 10 HiveQL analyses.
- Built a multi-view Power BI dashboard that identified a 58.55% depression prevalence rate and highlighted significant risk patterns involving academic pressure, sleep, dietary habits and suicidal thoughts.

Database Management Systems Project

MKA Technologies Repair Management Database System

- **Technology Stack:** Oracle APEX, Oracle Database, SQL, PL/SQL.
- Collaborated on designing and implementing an 11-table relational database normalized to Third Normal Form (3NF), applying primary keys, foreign keys, uniqueness rules and validation constraints.
- Developed an Oracle APEX dashboard featuring eight operational KPIs, three analytical charts and date-based filtering, and implemented a PL/SQL trigger that automatically recalculates receipt totals when repair records change, reducing manual calculation errors.

SKILLS AND COMPETENCIES

Technical Skills

- **Programming Languages:** C++, Dart, Java, JavaScript, PHP, Python, SQL, TypeScript
- **Frameworks:** Bootstrap, Flutter, jQuery, Node.js, Next.js, Tailwind
- **Databases:** Apache Derby, Cloud Firestore, MySQL, SQLite
- **Data Analytics:** Looker Studio, NumPy, pandas, Plotly, Power BI
- **Design Tools:** Adobe Express, Adobe Photoshop, Affinity, Canva, Figma
- **Productivity Tools:** Google Workspace (Docs, Sheets, Slides), Microsoft 365 (Excel, PowerPoint, Word), Notion
- **Concepts:** CI/CD Fundamentals, UI/UX Design, SDLC, Agile/Scrum

Language

Malay (Native), English (Proficient), Mandarin (Basic)

LEADERSHIP AND INVOLVEMENTS

Academic Executive, Information Technology Club (ITeC) | UiTM

- Collaborated with 3 HRD Corp representatives to organize "IT Career Insights" attracting 60 participants.

Deputy Secretary, Service Learning Malaysia-University for Society (SULAM) | UiTM

- Authored and published one program news article on UiTM NewsHub.
- Supported secretaries across 3 classes in preparing and organizing program documents in Kampung Budiman.

Facilitator, UiTM Open Day (Ekspo Selangkah ke UiTM) | UiTM

- Assisted 200+ prospective students and visitors with program enquiries and admission guidance.

Sports and Culture Executive, Student Representative Council | KML

- Coordinated an intercity bus service for 100+ students, managing passenger registration and schedules.
- Organized programs such as e-sports competitions joined by 50 students.

President, Music and Vocal Club | KML

- Led a committee of 12 and managed a club of 50 members, organizing cultural activities and competitions.

CERTIFICATIONS AND AWARDS

- SAP Certified - SAP Generative AI Developer
- Database Design & Database Programming with SQL (Oracle)
- Memory for AI Applications (MongoDB)
- Dean's List Recipient (4/6 Semesters)
- Best Group Presenter, GenAI Prompt Engineering Workshop (Cognizant)
- 1st Runner Up, Think. Prompt. Build. Challenge (Build with AI 2026 MMU & UTeM)
- Silver Medalist, International Research and Information Science Expo (IRISE)
